

## **Safety Topic of the Month**

### **2007 Major Incident Study**

**Richmond Refinery**

**November 2008**

## Introduction

The 2007 Major Incident Study (MIS) reviews incidents and major near misses that occurred from October 2006 (the end of the previous study) through September 2007. The incidents reviewed cover Chevron's global operations across all Operating Companies (Upstream as well as Downstream).

Please go to the refinery [MIS website](#) and review the appropriate presentation for your work group.

After discussing the Safety Topic of the Month, please send your feedback to [Cathy Culligan](#)
